

Reservation System: htlAdmin

htlAdmin is a fully integrated on-line reservation and website content management system designed especially to suit the needs of a lodging industry. It delivers all the features required by individually owned Hotels, Inns, Motels, Resorts, and Bed-and-Breakfasts. htlAdmin enables business owners to sell and manage inventory at low costs via the Internet, increasing occupancy rates and reducing sales cost. Unlike many third party solutions htlAdmin does not have any commissions or fees applied per reservation/room, so you get to keep all the profits.

PicasaWeb To BBcode

Unlike other services, Picasa does not have preformatted for BBCode links to the pictures. Here is my attempt to solve this problem.
